

Quick commands

Check host availability

Hosts file

```
[<hostgroupname>]  
<ipaddress1>  
<ipaddress2>  
<ipaddress3>  
<ipaddress4>
```

Check availability

```
ansible -i hosts <hostgroupname> -m ping --user <username> --ask-pass
```

Update all repositories

Ansible playbook

```
- hosts: Inc-kubernetes  
tasks:  
  - name: Update cache  
    apt:  
      update_cache: yes  
  - name: Upgrade all packages on servers  
    apt:  
      name: "*"   
      state: latest
```

Update command

```
ansible-playbook <pathtoplaybookfile> --user <username> --ask-pass --ask-become-pass -i <pathtohostsfile>
```
