Explanation of Centralized Downloads

This manual describes the page for centralized downloads on LNC Apps. Since LNC Apps provides a platform for multiple apps with different use cases, there is a need for a centralized download experience.

You can view your recent downloads here: https://apps.lucanoahcaprez.ch/downloads

App Information

Explanation of centralized Downloads approach

LNC Apps provides a platform for multiple applications with different use cases. To simplify file management, all downloads are stored in a centralized location. This allows users to access, re-download, and manage their files efficiently, regardless of which application the file originated from. This approach ensures consistency, easy access, and better control over downloaded items.

User Guide

1. **Sign In:** Sign into LNC Apps in your Browser: Login - LNC APPS (lucanoahcaprez.ch).
2. **Open App:** Click on the download icon in the header on the top right corner. Alternatively use the direct link: https://apps.lucanoahcaprez.ch/downloads.
3. **Switch/Scroll to section "Your Files":** Locate the "Your Files" section and continue with one of the next options.
4. If you already downloaded an item from LNC Apps via one of its applications, you can see all previously download elements.
5. Click on on the name of the file to download the element again. You can also delete the file from the server or view some stats about download count, file size and creation time.
